V7X Series
Hipot Testers

Electrical safety testing will never be the same.

With color touch LCD and high speed DSP technology, the compact and rugged V7X sets the standard for price/performance ratio. Made in the USA to meet tough UL, CSA, TUV and IEC Hipot requirements—the V7X provides unbeatable speed, accuracy, user safety and reliability.

Choose from six low cost models offering AC and DC Hipot to 5KV, leakage current measurement to 100 nano-amps, Insulation Resistance to 450GΩ, Ground Bond to 30 amps and built-in switching. Combine all that with USB, RS232 and Digital I/O interfaces, plus a two year warranty.

The V7X is simply unbeatable.

Vitrek V7X Series
For nearly 25 years, an obsessions has driven us to keep improving how hipot testers perform—speed, accuracy, user safety and reliability have been our driving force. Building a better hipot tester is in our DNA—it drove us to successfully engineer the first 4-in-1 safety tester back in 1990 and it has driven us to redefine performance in low cost hipot testers today.

The Hipot Experience has been Redefined
Our goal for the V7X series has been to achieve the unheard of. To provide state-of-the-art performance in a powerful yet compact multi-function hipot tester—and do it at an entry level price. From our easy-to-use Touch user interface, to its ultra-reliability, high efficiency, fan free design—the V7X provides unrivaled performance. Have we met our goal? You be the judge—compare the V7X to our made in China competitors and see how well American engineering stands up. We build Vitrek Hipot Testers. What’s on your production line?

Test 8 DUTs at a Time with the V76
For multi-channel hipot testing—choose the V76 with 24 channels of built-in high voltage switching. With the versatile V76, you can test hipot or IR for any combination of up to eight test points and you can measure low resistance (from .001 ohm to 60K ohms) on up to eight conductors. All automatically with a single touch and all from a single compact tester. For requirements exceeding eight points, the V7X can control up to four Vitrek 964i 64 channel HV Switching Systems—providing up to 256 channels of Hipot test capability. Simple, fast, automatic multi-point hipot—make the switch to the Vitrek V7X. You will be glad you did.

Features and Benefits
• 4.3” Color Touch Display—Easy To Use Intuitive User Interface
• 6 Functions to Choose From—AC/DC Hipot, IR, Ground Bond, Continuity and Built-in Switching
• Made in the USA—Designed and Built in San Diego CA
• Compact, Lightweight, Rugged, Fan Free, Fast (100mS min test time) and Accurate
• 5KV AC/DC Hipot, 20mA max source current
• Ground Bond 1-30A RMS (42 A peak), 100µΩ Resolution
• 100 nano-Amp Leakage Current Resolution
• Low Cost of Ownership—Two Year Calibration Interval
• USB 2.0, Serial/RS232, Digital I/O Interfaces are Standard
• Continuously Variable Insulation Resistance 20-5000V, 450GΩ Max
• Multi Mode IR with Steady/Rising Pass Mode
• Test Memory Stores up to 999 Steps and 60 Test Sequences
• Internal Self Test Fully Exercises Output and Verifies Current Accuracy
• Pre-Programmed Daily Verification Test With Optional PVD Test Load
• 150µS Safety Shutdown
• Ramped Discharge Capability
• Selectable ARC Detection 1-30mA
• Meets UL, CSA, IEC Safety Tester Requirements
• CE Safety Mark Certified to EN61010
• Two Year Parts and Labor Warranty

Vitrek V7X Series Performance Specifications

**AC Hipot**
- **Output Voltage**: 10 to 5000V RMS, 50/60 Hz (2500V max on V76)
- **Accuracy**: 1% of setting +5V, No load to full load
- **Resolution**: 1V at all levels
- **Max load current**: 20mA/Arms

**DC Hipot**
- **Output Voltage**: 20 to 5000V (2750V max on V76)
- **Accuracy**: 1% of setting +5V, No load to full load
- **Resolution**: 1V at all levels
- **Max load current**: 10mA

**IR - Insulation Resistance**
- **Test Voltage**: 20 to 5000VDC (2750V max on V76)
- **Accuracy**: 2.5% of setting +5V, No load to full load
- **Resolution**: 1V at all levels
- **Max Charge Current**: 5mA automatic
- **Max Capacitive Load**: 2uF

**Low Resistance**
- **Range**: 0ohm to 60Kohm
- **Accuracy**: 1.5% +0.015Ω (<13Ω), 3% +1ohm (<1KΩ), 5% (< 13KΩ)
- **Resolution**: Down to 0.001Ω
- **Min test time**: 60 mS

**Ground Bond**
- **Test Current**: 1 to 30A/Arms (42A peak), 50/60Hz
- **Accuracy**: 2.5% +3mΩ (<2A), 2mΩ (<6.5A), 1mΩ (otherwise)
- **Resolution**: 0.1mΩ (>6.5A), 1mΩ (otherwise)
- **Resistance Offset**: Test leads/fixture measurement offset may be universally applied.

**Test Completion**
- **End on Time**: Determination on final reading
- **End on Pass**: Test ends with PASS for any reading within limits
- **End on Fail**: Test ends with FAIL for any reading outside limits
- **End on Steady**: Test ends with PASS for a steady/rising reading within limits

**Test Timing**
- **Ramp Time**: For AC/DC Hipot: 0 to 99.9sec (0.1sec resolution, 0.05sec accuracy)
- **Test/Dwell Time**: 0.1 to 9999sec or user end (0.1sec resolution, 0.15sec accuracy)

**USB 2.0 High Speed Universal Serial Port**
- Controls up to 4 HV Scanners (N/A on V75 with built-in HV Switching)
- Digital I/O with Safety Interlock
- Optional Rear Panel Terminals or on V75
- 16 terminals for Hipot/IR & Continuity
- Advanced Design, Built-in Quality - Made in the USA
- Rugged V7X with Heavy Duty Silicone Bumper
- Ultra-Quiet, Ultra-Reliable, High Efficiency Fan Free Design
- RS232 Serial Port with Selectable baud rate up to 115Kbaud
Ramp Down
May be set to 0sec or same as ramp time, automatically skipped if no failure and next step is same AC/DC or IR test type.

Shutdown
Breakdown : within 150us
HV Safety : within 1ms
User Stop or Interlock opened : within 2ms
Resistance/Current Limit : within 100ms

Breakdown
For Hipot tests, automatically checks for sudden uncontrolled increases of load current throughout test, no min/max leakage required.

Arc Detect
For Hipot tests, settable to none or adjustable level between 1 and 30mApk, 5MHz bandwidth.

Pause Step
A timed pause of defined length between 0.1s and 999.9s.

Hold Step
A user continued hold step with a two line message to be displayed to the user while the step is executing.

Switch Step
Provides control of built-in 24 relay switching for hipot/IR and continuity (V76 only). For all other V7X models, provides control of up to 4 Vitrek 964 switch units, each switch step allows complete control over the states of all switches.

Test Memory
Up to 999 total test steps may be defined in up to 60 different sequences.

General Specifications
DSP Measurement
40,000 Samples per second for output control and parameter measurement

Display
4.3" 480 x 272 Color touch LCD user interface

Interfaces
USB 2.0, Scanner Control port (N/A on V75), RS232 and Contact Closure Digital I/O with Safety Interlock

Factory Warranty
Two year parts and labor

Standard Accessories
Alligator test leads for hipot and continuity units (TL-209), 4-wire alligator test leads for GB units (K-2R), operator’s manual CD, QT Pro V utility software, evaluation version QT Pro test automation software and power cord

Calibration
Two year accuracy specifications and recommended calibration interval, NIST Traceable certificate standard and ISO17025 Accredited with data available.

Safety
CE mark certified to EN61010

Power
115 or 230VAC ±10% factory set, 50-60Hz, 200VA max

Dimensions
5.25" (133mm) H x 9.5" (240mm) W x 11" (280mm) D

Weight
12 lbs, 5.5kg net (V70-73 and V75), 16 lbs, 7.3kg net (V74 and V79)

Country of Origin
Made in the USA
